

## Engineer intern (Chemical, Electrical, Mechanical)

Eastman Chemical Company

Posted: --

**DIVISION** Texas Operations      **APPROXIMATE HOURS PER WEEK** 40

**TRAVEL PERCENTAGE** No Travel

### DESCRIPTION

Do you want real, hands-on technical work experience in the chemical manufacturing industry? Is a friendly company culture, learning from industry experts, and social/networking opportunities what you seek? Working on real engineering projects with real cost savings, seeing your projects implemented in an industry setting, and being part of a team – does this sound appealing to you? Are you interested in a company that is really concerned about protecting the environment, focuses on safety and health of their employees, and gives back to the community? Do you need a break from the rigorous college schedule of engineering majors? If this sounds like you, Eastman Chemical Company would be thrilled to talk with you further about an internship experience at the Longview, TX location (northeast Texas on I-20 between Dallas and Shreveport).

Eastman is a global specialty chemicals company that produces a broad range of advanced materials, additives and functional products, specialty chemicals, and fibers that are found in products people use every day. Headquartered in Kingsport, TN, Eastman, with the completion of the Solutia acquisition, had 2012 pro forma revenues of \$9.1 billion and employs approximately 13,500 people worldwide.

Check out our informative website, [www.eastman.com](http://www.eastman.com), to learn even more about Eastman Chemical Company.

### BENEFITS FOR YOU

Participating in Eastman's Internship Program is a stepping-stone to full-time employment with the company after graduation. What better way to check out a company, geographic location, and fellow employees than to actually experience this yourself before graduation!

You will receive a competitive pay rate based on your college education level. Check out these additional cash incentives for you: Paid company holidays and access to health care coverage for you (includes spouse and children) with no premium payroll deductions. Eastman will reimburse your moving travel expenses round trip to Longview, TX.

Do you want "hassle free" apartment housing while completing your internship? Eastman provides a furnished one-bedroom apartment including utilities for your use (student pays partial cost of \$75 per week to Eastman). Just pick up the apartment key and move in your personal belongings – it is that easy! All undergraduate students are housed in the same apartment complex for social networking.

Eastman strives to broaden the internship experience for students. Your intern assignment will be in manufacturing or a support/service organization – to provide personal growth and enhance your overall learning experience. Participation in many planned activities provides a way for you to not only learn more about the company and corporate life, but to enjoy getting to know other engineers at several social events also.

### REQUIREMENTS

We are interested in the best and brightest chemical, civil, mechanical, and electrical engineering major undergraduate students. Your technical aptitude is demonstrated by your college GPA. We highly value students that display teamwork, initiative, honesty and personal integrity, and have a passion for engineering.

Eastman is an equal opportunity/affirmative action employer  
Eastman is an E-Verify employer
